Summary

As a dynamic contributor to the limitless world of software, I thrive as a Full Stack Developer. With a passion for creating seamless digital experiences, I bring a diverse skill set that bridges the gap between front-end and back-end technologies. My commitment to innovation and continuous learning drives my ability to deliver impactful solutions in the ever-evolving landscape of software development.

TECHNICAL SKILLS

Languages: Python, Java, C#, TypeScript & ES6, JavaScript, HTML5 & CSS3 (tagging language)

Frameworks: Django, Jinja, Angular & RXjs, Servlets and JSP, Bootstrap, ASP.NET Core, Razor & Blazor, **DBs:** PostgreSQL, MongoDB, MySQL, SQL Server, Redis

API: DRF, RESTful API, SOAP

Concepts: OOP, Design Patterns, Thread and Concurrency, TDD, BDD, Service Oriented, Cloud, Data Mining, Microservice, Socket Programming, RUP & UML, Scrum & Agile, Reverse Engineering, Web Security and Attacks, Relational DBs vs. NoSQL DBs, solid principles, Synchronous vs. Asynchronous, SEO

Tools: Ajax, GIT, jQuery, Azure DevOps, Swagger, Postman, Wireshark, Burp Suite, Linux, HTTP, VM, ESXI, Celery, Hangfire, Source tree, Tortoise, Gitkraken, Gitlab

EDUCATION

- Master's degree of Software Engineering (IRAN UNIVERSITY OF SCIENCE AND TECHNOLOGY)
- Bachelor of Software Engineering (ISLAMIC AZAD UNIVERSITY SOUTH TEHRAN BRANCH)

RECENT PROFESSIONAL EXPERIENCE (I'm working since 2016)

Dec 2022 – Present

Full-Stack Software Developer | sgi.ir

- Led the design and development of scalable applications using .NET Core and Angular, contributing to improved user experiences.
- Successfully integrated into an AI team, applying full-stack skills to contribute to image processing projects.
- Collaborated effectively with cross-functional teams, demonstrating strong communication and adaptability.
- Maintained a commitment to continuous learning and staying updated on industry trends.

Apr 2021 - Mar 2022

Full-Stack Software Developer | Pouyan Afzar

- Experienced full-stack developer with a focus on cybersecurity, specializing in malware analysis.
- Proficient in utilizing Angular and Django frameworks to develop comprehensive solutions for analyzing and combating malicious software.
- Adept at integrating various APIs, including Joe Sandbox and Virus Total, to enhance threat intelligence and streamline the analysis process.
- Contributed significantly to the field by coding reverse engineering tools for Cuckoo.CERT, showcasing expertise in developing software solutions for cybersecurity challenges. Proven ability to work effectively within a security team, combining technical skills with a deep understanding of malware analysis to strengthen overall defense measures.
- Experience in working with VMware and virtual boxes

2019 - 2020

Java Developer | Navaco (Maskan Bank)

- I served as a Java Backend Developer at Navaco, a prominent bank software company.
- Specializing in Oracle integration, I contributed to the design and implementation of robust solutions.
- My responsibilities included coding efficient backend components, participating in code reviews, and resolving complex issues.
- I played a key role in enhancing the functionality and performance of banking software, ensuring adherence to coding standards and embracing agile methodologies.
